

Kumar Manthri

mr.kumarmanthri@gmail.com — +91 7671979791 — LinkedIn — GitHub — Portfolio

Summary

Computer Science undergraduate specializing in Full Stack Development and AI-driven systems. Experienced in building scalable applications using React.js, Node.js, MongoDB, and MySQL. Strong in Data Structures, REST APIs, and backend architecture with a focus on production-ready solutions.

Education

Bachelor of Technology in Computer Science and Engineering 2021 – Present
Amrita Vishwa Vidyapeetham – 7.1 CGPA

Higher Secondary Education 2021 – 2023
Narayana Junior College – 92%

Secondary School Certificate 2021
Chalapathi Public School – 96%

Projects

Sarathi AI – Intelligent Travel Assistant 2026 – Present (Ongoing)

- Architected a scalable full-stack travel platform enabling personalized itinerary generation, real-time location insights, and intelligent recommendation workflows.
- Designing RESTful backend services with Node.js and MongoDB, integrating Google Maps APIs, and developing responsive UI using React.js.

Sanjeevani – AI-Assisted Healthcare Support System 2024 – Present

- Developing an AI-driven healthcare system for multi-condition symptom analysis and intelligent recommendation generation.
- Building backend modules and evaluating predictive models to enhance accuracy and system reliability.

Daily Cart – Full Stack E-Commerce Platform 2024

Live Demo

- Developed a scalable full-stack e-commerce system with 12+ RESTful API endpoints supporting product, cart, and order workflows.
- Implemented JWT-based authentication and optimized MySQL queries, structuring modular backend services for scalable and efficient user operations.

Skills

Languages: JavaScript, Python, Java, SQL

Frontend: HTML, CSS, React.js

Backend: Node.js, Express.js, REST APIs, JWT Authentication

Databases: MySQL, MongoDB

Tools: Git, GitHub, Postman

Core: DSA, DBMS, Operating Systems

Internship

Web Development Intern – Plasmid Sep 2024 – Nov 2024

- Engineered 10+ responsive UI components and integrated them with Node.js and MySQL backend services to enable dynamic, data-driven applications.
- Enhanced frontend performance by optimizing JavaScript execution and collaborated using Git-based workflows for efficient version control and feature integration.

Certifications

- IEEE International Conference Paper Presentation – ICMSCI (2026)
- Oracle Cloud Infrastructure Foundations Associate – Oracle (2025)
- Web Development Internship – Plasmid (2024)

Paper Presentation

IEEE ICMCSI 2026 – HELPR: Helmet Enforcement and License Plate Recognition

- Presented deep learning-based traffic monitoring system using YOLOv8 and EasyOCR.
